

ECOLOGICAL REVIEWS

GRASSLANDS AND CLIMATE CHANGE

Edited by

David J. Gibson and Jonathan A. Newman

British Ecological Society & Cambridge University Press

Contents

Introduction

1. Grasslands and climate change: an overview

David J. Gibson¹ & Jonathan A. Newman²

¹Southern Illinois University Carbondale, ²University of Guelph

2. Methodology I: detecting and predicting grassland change

Heather A. Hager & Jonathan A. Newman

University of Guelph

3. Methodology II: remote sensing of change in grasslands

Geoffrey M. Henebry

Michigan State University

Part I Grassland dynamics and climate change

Section overview (Gibson & Newman)

4. Projected climate change and the global distribution of grasslands

Mike B. Jones

University of Dublin

5. Production changes in response to climate change

Lauchlan Fraser

Thompson Rivers University

6. Will climate change push grasslands past critical thresholds?

Zak Ratajczak & Laura M. Ladwig

University of Wisconsin

7. Biochemical cycling in grasslands under climate change

Hugh A. L. Henry

University of Western Ontario, Canada

8. Climate changes effects on grassland ecosystem services

Sandra Lavorel

CNRS-Université Grenoble Alpes

Part II Species traits, functional groups, and evolutionary change

Section overview (Gibson & Newman)

9. Grassland invasion in a changing climate

Jane A. Catford¹ & Lizzie P. Jones²

¹King's College London, ²Royal Holloway, University of London

10. Climate change in grasslands – demography and population dynamics

Johan Ehrlén

Stockholm University

11. Impacts of climate change on tropic interactions in grasslands

Susan E. Hartley & Colin Beale

University of York

12. Grassland belowground feedbacks and climate change

Richard D. Bardgett & Marina Semchenko

University of Manchester

13. Keeping up: climate-driven evolutionary change, dispersal and migration

Kathryn A. Yurkonis & William Harris

University of North Dakota

14. The future biogeography of C₃ and C₄ grasslands

Elisabeth J. Forrestel¹ & Erika J. Edwards²

¹University of California Davis, ²Yale University

Part III Dealing with climate change effects

Section overview (Gibson & Newman)

15. Altered grazing systems: pastoralism to conventional agriculture

Philip K. Thornton¹, Mario Herrero² & Randall B. Boone³

¹International Livestock Research Center, Kenya, ²CSIRO Australia, ³Colorado State University

16. Climate change and the politics and science of traditional grassland management

Michael R. Dove

Yale University

17. Assessing rangeland health under climate variability and change

John Bradford, Seth Munson & Mike Duniway

United States Geological Survey

18. Restoring grassland in the context of changing climate

Sara G. Baer¹, David J. Gibson¹ & Loretta C. Johnson²

¹Southern Illinois University Carbondale, ²Kansas State University

19. Grasslands in the Anthropocene: research and conservation needs

David J. Gibson¹ & Jonathan A. Newman²

¹Southern Illinois University Carbondale, ²University of Guelph
